

0% PRICE REDUCTION MAZDA SHIFTER!

Dear customers,

we start the year 2022 with good news for all **Mazda fans**.

Due to significantly increased quantities and associated better purchase prices for the milling components of our Mazda series, it is now possible for the first time to reduce the prices for our Mazda shifters!

In addition, we were able to fine tune a few technical details, so that we have optimized again in the direction of creep strength. Of course we deliver as usual the known complete scope of supply with all necessary parts for the installation.

Furthermore, a shifter for the 6-speed transmission will be added to the Mazda product range. The development will be finished soon. More information about delivery time will follow shortly.

Also our parts certificate is still automatically included in the delivery for customers from Germany  and can always be ordered by mail for every non-Germany  delivery.

The new prices are already valid, please take them from the attached Excel file.

We are looking forward to supplying you with our high quality products in the future.
